# Work Experience

### IBM – Full Stack Developer

*Feb 2019 – Today*

- Working on a new project using IBM cloud technologies like IBM event streams (Kafka) and databases. Svelte as fronted and nestjs as backend.
- Worked on a project using svelte as fronted and express as backed, also I implemented a functionality to send confirmation emails.
- Worked on internal project using React/Redux for the fronted and express for the backend, with a connection to IBM cloud technologies and database.

### Tata Consuntancy Services – Developer

*Feb 2019 – Oct 2020*

- Worked on a backend project using java
- Involved in internal projects
- Worked with Learning and Development team to organize and give sessions about the technologies and tools that we constantly use in the workspace

### Unosquare – Software Engineer

*Mar 2017 - Ago 2018*

- Made a static website using HTML5, JS, CSS3, jQuery, bootstrap and .NET with C#
- Worked on several opened source projects using frameworks like angular, Typescript, React and configurations with webpack, I also did unit testing
- Used C# with .NET and .NET Core, usually making modifications that required changes to the API and connection to a Database. I also did unit testing.

### Unosquare – Internship

*Sep 2016 – Mar 2017*

- Was preparing and passed the certification test form Microsoft 480, 486 and 487.
